

BACKGROUND AND NOTES ON THE 2015 TABLES FOR YOUTH

These tables provide detailed survey results from the October 2015 Statewide survey of people without permanent shelter. The data are provided to help planners and service providers develop summary information about the characteristics of homeless people, their experiences and needs, and the barriers that prevent them from obtaining housing.

For actual counts of people who were homeless on October 22, 2015, see the report *Statewide and Region Counts of Homeless People* found at http://mnhomeless.org/minnesota-homeless-study/detailed-data-counts/2015/All-2015-Homeless-Counts_3-16.pdf. Other reports regarding the 2015 homeless study are published at www.mnhomeless.org as they are available.

To fit with legislation, we have defined these segments of the youth homeless population as follows:

- **Unaccompanied minors:** age 17 and under and not with their parents.
- **Young adults:** age 18 through 24.
- **Youth** combines both groups to describe all homeless persons ages 17 and under and on their own.

Interviews were conducted on October 22, 2015 with 213 unaccompanied minors, ages 17 and under, including 119 in temporary housing programs and 94 in non-shelter locations. These minors had a total of 5 children with them. In addition, interviews were conducted with 1,250 young adults, ages 18 through 24, including 889 in temporary housing programs and 361 in non-shelter locations. Young adult respondents had a total of 539 children with them.

NOTES FOR INTERPRETING THE DATA TABLES

Tables report frequency distributions for all questions included in the survey. There are two sets of data tables about homeless youth. The first includes breakdowns by geographic area (Twin Cities metro area vs. greater Minnesota), **by gender, and by shelter type** (emergency shelter, transitional housing programs, and temporary arrangements/street). **The second includes break-downs by age grouping** (minors vs. young adults) **and by geographic area** (Twin Cities metro area vs. greater Minnesota) The metro region includes the following counties: Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington. Temporary arrangements include outside, abandoned buildings, staying with friends or family members, and temporary paid, exchange, or voucher arrangements.

The data tables are organized by question. Within each question, data tables display the responses for greater Minnesota, the Twin Cities metro area, and statewide. For one set of data tables, they are also organized by shelter type (emergency shelter, transitional housing programs, and temporary arrangements/street) and gender; for the other, they are organized by age grouping (minor youth, age 17 and under vs. young adults, age 18-24).

The total number of responses is different for each question, based on the number of valid responses to that question. Missing data (cases when a respondent did not answer a question) are not reported or included in the percentages.

The percentages apply only to the respondents who were qualified to answer that question. Some tables report data that were collected only from those who answered a previous question in a certain way.

For example, many questions about children are asked only of those persons who have children with them, so the percentages apply only to that group.

The tables do not contain data for all homeless youth in Minnesota. Although efforts were made to interview as many persons as possible, not all homeless youth staying in shelter on October 22, 2015 were interviewed for this study. Based on counts of actual shelter use on survey night, 49 percent of youth were interviewed. Interviews are only conducted with one person per household and the survey is voluntary. In addition, youth are more likely to be sleeping in temporary arrangements with friends and less likely to be found in shelters. It was not feasible to cover the state to find all homeless youth staying in non-shelter locations. Consequently, this study describes primarily those homeless youth who are connected in some way to service providers and does not represent all youth experiencing homelessness on the date of the survey.

Unlike in the adult data tables, these data are not weighted. In the companion adult tables, survey results have been statistically adjusted to reflect the actual adult populations residing in shelters and transitional housing programs (1,502 men and 1,428 women) on the day of the survey. We do not weight the data in the youth tables. This is because many homeless youth do not use shelter and we do not want to over-represent the backgrounds and experiences of the small proportion of those using shelter during the one-night snapshot.

For questions about the study, please refer to our publications on homelessness at www.mnhomeless.org or contact michelle.gerrard@wilder.org.
